

BIOLOGICAL INNOVATION

Sensibio DS+

- **Anti-fungal**
Active ingredients inhibit the proliferation of Malassezia yeast
- **Anti-inflammatory**
Liquorice root extract soothes and provides relief of discomfort
Laminaria (Golden Seaweed) inhibits the synthesis of pro-inflammatory cytokines to prevent inflammation
- **Anti-itch[^]**
Zanthalene inhibits the production of nitrogen monoxide which stimulates the nerve and causes itching sensation
- **Anti-seborrheic[^]**
Zinc optimised by Vitamin B6 and acid inhibit over-secretion of sebum

PROVEN RESULTS

Clinical studies on Sensibio DS+ CREAM²After 28 days : Improvement in **100%** of cases

After 56 days : **-84%** Erythema | **-100%** Pruritus | **-93%** Tightness
-95% Scales | **-92%** Burning | **-100%** Tingling

Disappearance of Seborrheic Dermatitis in **58%** of cases[^] Anti-itch: Only in Nodé DS+ shampoo;

Anti-seborrheic: Only in Sensibio DS+ cleansing gel and Nodé DS+ shampoo

Sensibio DS+

FOR SENSITIVE SKIN WITH SEBORRHEIC DERMATITIS

THE SKIN ITSELF

INSPIRED BIODERMA TO FIND A WAY TO REDUCE ITS SENSITIVITY.

BIOLOGY AT THE SERVICE OF DERMATOLOGY

BIODERMA
LABORATOIRE DERMATOLOGIQUE

WHAT IS SEBORRHEIC DERMATITIS?

Seborrheic dermatitis is a chronic superficial and squamous inflammatory dermatitis characterised by

- Red spots or patches with indefinite contours
- Oily and yellow pruriginous scales
- Itching and burning sensation

Common areas affected

- Roots of the eyebrows
- Sides of the nose
- Behind the ears
- Fold between the nose and lips
- Scalp
- Trunk of the body

WHAT CAUSES SEBORRHEIC DERMATITIS?

Seborrheic Dermatitis patients genetically have more Malassezia yeast present on their skin

Proliferation of Malassezia yeast increases in areas with excess sebum

Malassezia yeast feeds on the sebum and releases free fatty acids

Free fatty acids irritate the skin and trigger inflammation and hyperkeratinisation

Resulting in redness and/or scales associated with Seborrheic Dermatitis

RECOMMENDED FOR SENSITIVE SKIN WITH SEBORRHEIC DERMATITIS

I CLEANSE

1

Sensibio DS+

PURIFYING, SOOTHING
CLEANSING GEL

- Gently cleanses and removes squames
- Soothes irritated skin and reduces redness
- Regulates sebum secretion
- Limits the proliferation of malassezia yeast

DERMO-BREVETÉ

Use once or twice a day in association with or as a follow-up treatment. Wet the face. Pour a sufficient amount onto hands and lather up. Massage across face and rinse. Avoid eyes and lips.

Paraben-free – Soap-free – Fragrance-free – Hypoallergenic

I TREAT

2

Sensibio DS+

SOOTHING PURIFYING
CREAM

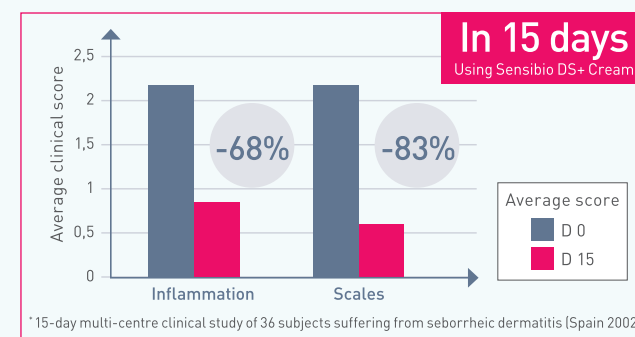

- Soothes irritated skin and reduces redness
- Moisturises and strengthens the skin
- Limits the proliferation of malassezia yeast

DERMO-BREVETÉ

Use once or twice a day in association with or as a follow-up treatment. Apply after cleansing with Sensibio DS+ cleansing gel.

Paraben-free – Fragrance-free – Hypoallergenic – Non-comedogenic

FAST & EFFECTIVE RELIEF*

I PROTECT

3

Photoderm AKN Mat SPF 30

MATTIFYING
HIGH UV PROTECTION WITH
CELLULAR BIOPROTECTION®

- SPF 30, UVA 13 / PA+++
- High protection against UV damages
- Protects the cellular DNA and preserves the skin's anti-oxidant abilities to minimise premature ageing
- Improves sebum quality and limits appearance of blemishes
- Light fluid texture with matte finish

CELLULAR BIOPROTECTION® PATENT

FLUIDACTIV® PATENT

Apply over face evenly in the morning after cleansing, toning and moisturising.

Paraben-free – Hypoallergenic – Non-comedogenic – Photostable – Water-resistant – Non-greasy – No white traces

89%
Mattifying¹

[1] 351 subjects aged 18 to 65 (69.4% women, 30.6% men) with a recurrent risk of moderate to severe acne. Applied Photoderm AKN Mat evenly and liberally onto face and exposed to sun during summer for 2 to 3 weeks; 3 times (morning, lunchtime and afternoon) to more than 4 times a day. If the exposure lasts more than 6 hours, the product is reapplied every 2 hours – France 2009

FOR SCALP

4

Nodé DS+

ANTI-DANDRUFF
INTENSE SHAMPOO

- Gently cleanses the hair and scalp thanks to its non-detergent formula
- Effectively clears persistent dandruff
- Regulates sebum secretion and prevents recurrence of dandruff
- Limits the proliferation of malassezia yeast

DSACTIV® PATENT

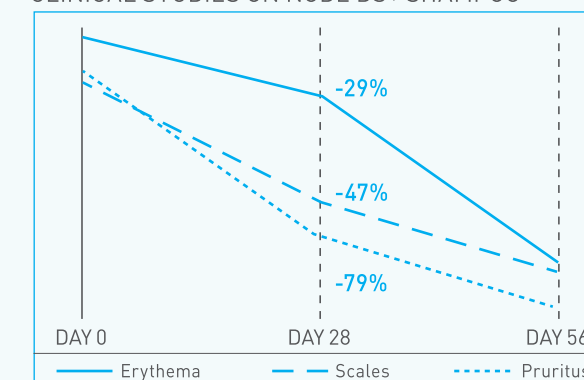

Intensive treatment: For first 3 weeks, use 3 times a week
Maintenance treatment: For subsequent weeks, use 1 to 2 times a week.
For the rest of the days, use Nodé Fluide shampoo. Use in association with or as a follow-up treatment.

Step 1: Wet the hair/scalp. Pour a sufficient amount onto hands and lather up. Massage across hair/scalp and rinse off. Avoid eyes.

Step 2: Repeat Step 1 but leave on for 5 minutes before rinse off.

Paraben-free

CLINICAL STUDIES ON NODÉ DS+ SHAMPOO²

After 28 days : Improvement in 95% of cases

After 56 days : **-81%** Erythema | **-89%** Scales | **-100%** Pruritus
Disappearance of dandruff in 55% of cases

[2] Monocentric clinical study of 21 subjects with mild to moderate Seborrheic Dermatitis on scalp and face. Applied Nodé DS+ shampoo on alternate days for 1 month followed by 2 times a week during the 2nd month. Applied Sensibio DS+ cream on face 2 times a day for 2 months. (Argentina)
